Miss Pardon's last work is one of the most remarkable fictions we have ever read; and, why should we not say it courageously, eince we think it homestly, we consider 'Reginald Lyie,' in fact, to be at least equal, if not superior, to any novel written by a woman in the English language. The great point is the morality of the work. Nothing can be higher. The tone all through is admirable; the treatment of incidents and machinations is skillful, and there is not a little of brilliancy and originality in the evolution of the result. We will not spoil the interest by telling the story, but it lesson we might admirable by observing that you could inscribe for morte on the title page of such a narrative the suggestive words—'Problity, Abmained and Providence.' The opinion of the American Press has been unanimous in favor of this excellent fiction. We subjoin a few of the rotices:

Miss Pardoe is worthilly ranked among the first female writers of the day, and this republication of one of her best novels will be very acceptable to her many American readers. It, in a marked degree, exhibits her power in depicting character.'

Her present novel is, in point of literary merit, far shove the average standard of modern works of fiction.'
